Uncontrolled Airspace

The Newsletter of EAA Chapter 1310

August - September, 2020

Next Meeting

Wednesday August 12 About 7:45 PM

ONLINE MEETING

The EAA Chapter 1310 meeting will be held following the VFR Club meeting at approximately 7:45 PM

VFR Club Meeting ONLINE Wednesday August 12

7:00 PM. This month's topic is collision avoidance.

See login instructions on Page 2

Register for FAA WINGS credit at:

https://www.faasafety.gov/SPANS/event_details.aspx?eid=101343

Next Event

Fall Safety Seminar - Saturday October 17

10:00 AM – Noon

Topic to be determined

2021 Membership Renewals

Renew your chapter membership through the online [store](#), or mail a check payable to EAA Chapter 1310 to the address on the left. We'll get your membership card back to you.

Renew for three years for \$60. Save \$15.

Online Meeting Instructions

We will again be holding our monthly meeting and VMC Club meeting online through Zoom.

Topic will be Collision Avoidance.

If you want FAA WINGS credit, register at:

https://www.faasafety.gov/SPANS/event_details.aspx?eid=101343

You will receive a confirmation e-mail with the information to attend the meeting using Zoom Video Conferencing.

If you have difficulty, send an email to meetings@eaa1310.org with your question.

The primary method of receiving notices of VMC Club meetings is by registering at faasafety.gov. Under Account Preferences, set your email notification preferences to include Local Air Safety Information and New Event Notifications. Under the Seminar Preferences tab, enter your Zip Code, and radius.

If you only want to attend the meeting without credit, or just attend the EAA Chapter meeting, start the Zoom application, and go to meeting number 820 4305 5593 with password 779873.

Newsletter Changes to Bi-Monthly Distribution

Since there isn't much chapter activity, there isn't much information to put in the chapter newsletter. Therefore the distribution will change to every second month. There will be a notice sent out alternating months with the VMC Club meeting and registration information, and any Chapter 1310 meeting information.

You can also get a text message reminder the day before the meeting or event. To get on that distribution list, send an email to info@eaa1310.org with your cell phone number and service provider.

Watch the Current EAA Chapter Videos

Since we haven't been able to hold in-person meetings, we have made the most recent EAA Chapter Videos available to watch online.

The EAA Chapter Office has changed the format of the monthly video presentation. Instead of a preset program, we are able to choose the segments we want to see. There is a standard introductory segment with current EAA topics. Then we add video pertaining to the specific topics of Homebuilding, Aerobatic, Light Sport, Ultralights, Vintage, Warbirds, History or Timeless Voices. We can then add a Hints for Homebuilders lesson.

This month, Charlie Becker announces a Ray Foundation fundraising challenge, how a chapter can win a TIG welder, Young Eagles day camps, monthly homebuilders web seminars, and a refresh of the Speaker Bureau database

Sole Survivor Ron Price bought his rare 1938 Luscombe Model 4 in 1977 when it was on display in a museum, but the restoration didn't begin in earnest until nearly 30 years later.

Hints for Homebuilders - Clean Air for Your Shop Mark Forss from the EAA staff shows how to home build a dust collector to help keep the air in your workshop clean.

Simsbury Fly-In Changing to a Food Truck Drive Thru

VOLUNTEERS URGENTLY NEEDED!

We are still in urgent need of volunteers for the 2020 Simsbury Airport Food Truck Drive Thrus on August 15 and 16th and September 26th and 27th! Choose one day or as many as you would like to help with. Obviously, with Covid, we are taking the protection of our volunteers extremely seriously. All volunteer positions are socially distanced from the public and all volunteers will be provided with PPE such as masks, gloves, hand sanitizer, etc. And don't worry, volunteers will of course be fed, get a free T-Shirt and have a great time with a bunch of aviation loving friends too!

This year, due to Covid-19, our Fly-In will take a little different form.

We'll be hosting four Food Truck Drive Thrus on the airport grounds to provide financial support to maintain our local airport in Simsbury. Volunteers help facilitate the event and engage in supporting our aviation community.

Our volunteers help to make this a fantastic experience for our attendees, so please volunteer whatever time you can to help.

For more information describing these events, go to [Simsbury Airport Food Truck Drive Thru on Facebook](#).

If you are able to volunteer this year, please click on the form below to sign up:

These Martin Firsts help make

U.S. AIRCRAFT

SECOND TO NONE!

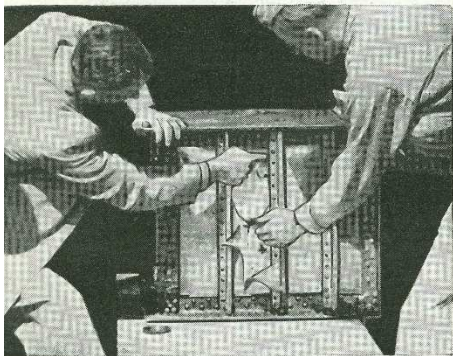

FIRST all-plastic aircraft nose, used on the Martin B-26, giving bombardier full visibility and absorbing recoil of forward gun. Martin was working on plastic noses and other parts as far back as 1921. Today some Martin types contain 400 plastic parts.

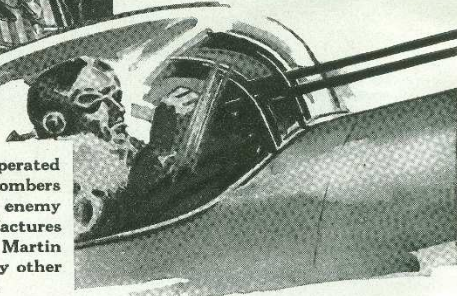

FIRST to develop "heat therapy" for airplane wings. A giant heating "pad" is applied to aluminum covering of wing, expanding this "skin." Riveted when hot, skin shrinks when cool, fits tightly over spars without wrinkling or buckling.

FIRST to develop photo-layout method, utilizing giant camera. Through this method, scale photos are reproduced directly on sheet metal, thus speeding production. Moreover, drawings may be scaled up or down swiftly, accurately.

FIRST U. S. power-operated gun turrets, giving our bombers strong protection against enemy interceptors. Martin manufactures these turrets not only for Martin bombers but also for many other types of American aircraft.

These are only a few Martin "firsts." Some are still close-guarded military developments, while numerous others, individually minor but collectively important, are in use throughout the aviation industry. But Martin engineers are never satisfied. In scores of diverse fields, work goes on to give America even mightier planes for today's aerial fights, tomorrow's peacetime flights.

FIRST U. S. self-sealing fuel tank. Martin Mareng tanks are now standard equipment on many American aircraft. Martin experiments on self-sealing fuel tanks date from 1919, during which period over 285 different materials were tested.

Martin AIRCRAFT

Builders of Dependable Aircraft Since 1909
